Subject: EJ Screen Request
Attachments: location map with area of review.pdf

Hi Alan and Ruben,

I have another Underground Injection Control (UIC) permit project that needs an EJ screen report. Clean Energy Systems (CES) proposes to construct a Class VI injection well for geological sequestration at its Mendota energy plant. The permit, if issued, would be valid for the project lifetime. The well to be permitted will be located at:

Clean Energy Systems – Mendota Site
400 Guillen Parkway
Mendota, CA 93640-0099

The permit application uses a radius of 2.5 miles from the proposed well for area of review . Attached is a location map with the area of review.

Thanks,
Calvin
